**Clarification to Response to Bidder Set #3, Question #1
(from Addendum #2, December 14, 2018)**

1. It was mentioned that the bidding Contractor would need to be prequalified by the FDOT to bid this project. Does this mean the Contractor will need to be prequalified in at least 50% of the work class breakout? If so, please provide the Work Class Breakout for this project.

RESPONSE: Per the bid doc (Page 5, Minimum Requirements for Submitting a Bid), contractors must be FDOT pre-qualified for Road and Bridge Construction and submit a copy of the pre-qualification letter at the time of the submittal. Major/minor work mixes were not identified in the solicitation and I assume this is what the contractor is referring to as Work Class Breakout. The contractor's letter should state that he is pre-qualified in Road and Bridge Construction.

The contractor must possess a General Contractor's License and be certified as such. Page 8 of the Bid Document (Licenses and Certifications) requires all applicable licenses and certifications to be submitted with the bid also. The contractor also must perform at least 50%/cannot sub out more than 50% of the work.

CLARIFICATION: See the attachment 'Prequalification Work Classes for FDOT Contracts'
